

## Six Day Creation

*Six Day Creation*

# Noah's Ark; Thinking Outside the Box with Tim Lovett

\$14.99

This DVD which includes important interview footage with Dr. Whitcomb and Ken Ham, tells why! As we learn more about ancient shipbuilding, we must ask the question "When Noah constructed the Ark, did he use the technology of the day to follow the Lord's directions and build a ship able to withstand the oceans' tempest?" In the classic book *The Genesis Flood*, Drs. Henry Morris and John Whitcomb introduced the world to the ship that saved humanity, bringing it to life from the pages of Scripture. As we learn more about ancient shipbuilding we must ask the question, "When Noah constructed the Ark, did he use the technology of the day to follow the Lord's directions and build a ship able to withstand the oceans' tempest?" Following in Morris and Whitcomb's footsteps, Ark researcher Tim Lovett applies new findings to the shape of the Ark while maintaining an unwavering commitment to the Word of God. This ground-breaking, new DVD about the Ark is the highest quality documentary we've ever produced! You'll see animations, interviews, and images of the Ark that explain the most perplexing of questions. Look inside the ship that saved humanity. Rest in the authority and inerrancy of God's Word as the Ark and its reality is affirmed from the pages of Scripture and the most recent of research. Get the answers your loved ones demand as you learn from Lovett, Dr. Whitcomb, and apologist Ken Ham. Tim Lovett earned his degree in mechanical engineering from Sydney University (Australia) and was an instructor for 12 years in technical college engineering courses. Tim has studied the Flood and the Ark for about 13 years and is widely recognized for his cutting-edge research on the design and structure of Noah's Ark. 25 Minutes
